

Stage 1: Encourage water conservation methods through public awareness of methods to reduce overall usage by 10% through the following practices: • Re-use and re-circulate water whenever possible • Check for and repair all leaks • Outdoor lawn and landscape watering should be done during times of low evaporation loss and use timers to avoid overwatering and waste. • Washing vehicles at a car wash usually uses less water than washing at home • Washing sidewalks, driveways, parking areas, streets, tennis courts, or any outdoor surfaces with water could be considered wasteful.

Stage 2: Continue to encourage the water conservation methods with a goal to reduce overall usage by 20% through the following practices: • Re-use and re-circulate water whenever possible • Check for and repair all leaks • Outdoor lawn and landscape watering should be done between the hours of 8:00 p.m. to 10:00 am. • Limit watering of lawns and landscapes to once every 5 to 7 days. • Wash vehicles only at a car wash when needed. • Keep decorative fountains, landscape ponds, and swimming pools covered whenever possible to reduce evaporation. • Do not use water to wash sidewalks, driveways, parking areas, streets, tennis courts, or any outdoor surfaces except for human or animal health and safety reasons, or fire hazard prevention. • Providing groundwater to ponds, tanks, lakes, reservoirs, swimming pools, or other surface impoundments for holding water that have a total capacity of more than 100,000 gallons is discouraged. • Water livestock in leak-proof troughs (livestock tanks) when practical.

Stage 3: Continue to encourage the practice of water conservation methods and reduce overall usage by 30% through the following practices: • Re-use and re-circulate water whenever possible • Check for and repair all leaks • Outdoor lawn and landscape watering should be done between the hours of 8:00 p.m. to 8:00 am. • Limit watering of lawns and landscapes to once every 5 to 7 days. • Wash vehicles only at a car wash when needed. • Keep decorative fountains, landscape ponds, and swimming pools covered whenever possible to reduce evaporation. • Do not use water to wash sidewalks, driveways, parking areas, streets, tennis courts, or any outdoor surfaces except for human or animal health and safety reasons, or fire hazard prevention. • Providing groundwater to ponds, tanks, lakes, reservoirs, swimming pools, or other surface impoundments for holding water that have a total capacity of more than 100,000 gallons is prohibited, and for total capacities less 100,000 gallons is discouraged. • Water for dust control only when required by law. • Watering livestock in leak-proof troughs is recommended.

Stage 4: Continue to encourage the practice of water conservation methods and reduce overall usage by 40%. • Re-use and re-circulate water whenever possible • Check for and repair all leaks • No watering of lawns or landscapes. • No vehicle washing • Do not use water to wash sidewalks, driveways, parking areas, streets, tennis courts, or any outdoor surfaces except when required for human or animal health and safety reasons, or fire hazard prevention. • Providing groundwater to ponds, tanks, lakes, reservoirs, swimming pools, or other surface impoundments for holding water regardless of capacity is prohibited. • Water for dust control only when required by law. • Watering livestock in leak-proof troughs is highly recommended.
